Times Tables Cards (x 2) Instructions

Cut round the outside of each card then fold on the dotted line. Glue the two halves together. Now you can test yourself! Shuffle the cards and put them in a pile. For each card, say what's on the other side (e.g. if you have '8', you need to say how many 2's are in 8, if you have '3 × 2' you need to say the answer). Turn the card over to check your answer. If you get one wrong, put it in a separate pile and try the tricky ones again at the end.
